Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on 04 October 2004.

2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) ☒ Claim(s) 11-17, 37 and 38 is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) ☐ Claim(s) _____ is/are allowed.

6) ☒ Claim(s) 11-17, 37 and 38 is/are rejected.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-17 and 37-38 in the reply filed on 04 October 2004 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-12, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 6,487,824 B1 West et al.

In regard to claim 11: West discloses the claimed invention Fig. 1, column 4, lines 7-12, the door 10 including a frame 14 having a first side and an opposite second side, a first thermoformed panels 24 coupled to the first side of the frame 14, having a first three-dimensional, non-extrudable front surface and first rear surface substantially parallel to the second front surface, a second thermoformed panels 26 coupled to the second side of the frame 14, having a first three-dimensional, non-extrudable front surface and second rear surface substantially parallel to the second front surface.

In regard to claim 12: West discloses the claimed invention Fig. 1, the frame 14 including at least a top horizontal beam 20, a bottom horizontal beam 22, a first vertical beam 16 and a second vertical beam 18.

In regard to claim 17: West discloses the claimed invention Fig. 1, the first rear surface having a first plurality of fat sections, the second rear surface having a first plurality of fat sections, the frame 14 is coupled to the first and second plurality of flat sections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over West in view of US Patent No. 3,271,919 Olton.

In regard to claim 15: West discloses claimed invention except having a side covers covering at least a portion of the perimeter. Olton teaches Fig. 1, a door having a perimeter with side covers 17 covering at least a portion of the perimeter. It would have been obvious to one of ordinary skill in the art at the time of invention was made to provide a door with side covers in order to cover the marginal side of front and rear side panel.

Claim 13-14, 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over West in view of US Patent No. 5,557,899 Dube et al.

In regard to claim 13: West discloses the claimed invention except the support bar coupled to the to the top horizontal beam of the frame. Dube teaches Fig. 1, column 3, lines 32-36, a reinforcing member 8 coupled to the top horizontal beam 15 of the frame 11. It would have been obvious to one of ordinary skill in the art at the time of invention was made to provide the top horizontal frame with support bar (reinforcing member) in order to interconnect all the frame members about the frame.

In regard to claim 14: West discloses the claimed invention except the support bar coupled to the to the bottom horizontal beam of the frame. Dube teaches Fig. 1, column 3, lines 32-36, a reinforcing member 8 coupled to the bottom horizontal beam 16 of the frame 11. It would have been obvious to one of ordinary skill in the art at the time

of invention was made to provide the bottom horizontal frame with support bar (reinforcing member) in order to interconnect all the frame members about the frame.

In regard to claim 16: West discloses the claimed invention except a post couple to the frame. Dube teaches Fig. 1, column 3, lines 27-30, a post 19 coupled to the frame 11. It would have been obvious to one of ordinary skill in the art at the time of invention was made to provide a post in order to construct a rigid interlocked door structure capable of resisting warping.

Claims 37-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over West.

In regard to claims 37-38: West discloses the claimed invention except the first and second front surface having a first and second brick pattern. It would have been an obvious matter of design choice to provide the first and second panel with brick pattern in order to create different design appearance, since applicant has not disclosed that specific design pattern solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with West' invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
